

Fontaine

Gentlemen:

You surely know that we are a world leader in chromium plated nickel screens for continuous centrifugals and in stainless steel, brass and copper screens for batch type centrifugals and that the quality of our products is of the highest repute worldwide.

As the **only manufacturer** who produces screens and backing liners for continuous and batch type centrifugals of all makes and sizes as well as filter screens for all types of mud filters and juice strainer screens we cover the full range of your screen requirements. Buying from us helps you save a lot of time and money as there is **no manufacturer other than us** who can give you this comprehensive service.

Our screens for continuous centrifugals show the following outstanding features:

- FONTAINE screens are made of pure nickel with a hard chrome layer, having a perfectly smooth working face to prevent crystal breakage.
- FONTAINE pure nickel screens with hard chrome layer have an extremely long service life.
- FONTAINE pure nickel screens with hard chrome layer ensure a uniform product and low molasses purity through the great uniformity and accuracy to gauge of their holes and slots.
- FONTAINE pure nickel screens ensure maximum freedom from clogging through the conical design of their holes or slots.
- FONTAINE pure nickel screens are manufactured at low cost even in case of small quantities.

Our screens for batch type centrifugals offer the following advantages:

- FONTAINE perforated brass and copper screens in up to 1 mm or 18 B+S material gauge with truly conical slots or round holes are less prone to clogging than cylindrical type perforated screens of most other manufacturers thus ensuring maximum centrifuging capacity throughout their service life.
- FONTAINE screens guarantee a uniform product and low molasses purity during the entire service life.
- FONTAINE screens reduce down-time caused by sheet replacement.

A novelty are our stainless steel screens for batch type centrifugals of all makes and sizes with slot perforation and / or round hole perforation up to 0.6 mm or 0.24" thickness. Long term tests of these screens have shown their superiority over other types and offer you the best return on investment ratio ever for your screen purchases.

You can buy all these advantages when sending us your order.

Please send us your specifications now as we want to bring down your screen costs.
